The Elden Ring Game is a fantasy action RPG developed by Tenki Co., Ltd., the same studio behind the popular *Garou: Mark of the Wolves*. The game is set in the Lands Between, a mythological world of various tribes and clans where ancient magic is said to be able to flow. The story takes place in the middle ages, a world where a clash among the gods is still unfolding. The prevailing deities have left this world, leaving the fate of its people to the ancient magic. Through both the gods' words and their crafts, people began to live, with their strength and hopes built around the magic. However, their wishes and dreams remain tied to the current system, and their fate is intertwined with the other tribes and clans in their surrounding areas. By making use of the multifaceted world of the Lands Between, the Elden Ring Game

aims to achieve the following objectives:

- Experience the atmosphere of the Lands Between Set in the middle ages, the world of the Elden Ring Game is set in the Lands Between, an area where ancient and modern cultures collide. You will discover the mythological world of the Gods who returned to this world from the heavens. You will also engage in the battles of Gods and Titans, the shadows of the fallen gods and the masters of industry, and the adventures of heroes and priests who wield the power of the Gods. The world is vast and has an incredible number of hidden secrets. The variety of both the scenery and the people you meet is something that can be experienced through the Elden Ring Game. The very different cultures, art, and weapons used by the inhabitants of the world all create a setting full of mystery. The world is small and easily accessible. As you travel through the Lands Between, you can experience this variety in a short time.
- Experience the Difficulty of the Lands Between The Lands Between is a world full of dangerous monsters and various traps, and is home to demons and the vengeful gods who were once humans. You will experience the land-spanning action of battles with multiple foes of all sizes, as you leave the Lands Between to enter a dungeon. In order to navigate the labyrinths and prepare for this, you will be equipped with gear that was crafted by a sage or priest. The difficulty level of this is generally high, so you will need to earn the skills needed to overcome your enemies, including the Holy Item skill, Magic Skill, and

I want it to visualize a table of data with the shape files that are contained in a shape folder. Below is an example of what I have so far below is an example of what i have so far

A: You can load any JSON or GeoJSON data from an external URL in D3. The CSV data for your shapefiles are structured so it should be very easy to extract the data into the format which is required by D3. Here is an example of loading a GeoJSON file as a feature collection and then using the data to create a path. For the demonstration I have used an example of OSM data which can be found at

```
var width = 960,
    height = 500;
var svg = d3.select("body").append("svg")
    .attr("width", width) .attr("height", height);
var path =
