Am I doing something wrong? Why doesn't addClass work? \$('button').on('click', function() { \$(this).addClass('test'); }); button A: you have to name it like this \$('button.test').on('click', function() { \$(this).addClass('test');

Original post: VSTI-File - Klyne page (free, direct download from Klyne's site). Download the plugin from Klyne's page (very simple one-click installer). When you get a message from the software to install Plugins, simply install the "VSTI-File\_Generic\_2.0.8.exe" from this site : Choose "Plugins" in your VST folder, and you will be prompted for the location of your new VST folder. File-Name : VSTI-File\_Generic\_2.0.8.exe VSTI-File is available for both Win and Mac platforms : Original post: The software you might be interested in is the MASCHINE Extended Power Collection, which is available here: Nick A: It seems you get this error when the version of fl studio you are trying to run is not supported. You should download a compatible version here: I've run a few samples and they run fine, so the music isn't that bad. Q: Iterative computation of class equality in Scala I have the following class definition in Scala: class BaseClass(inode: Inode) { def this(inode: Inode) { this(new Inode(inode.inodeType, inode.name, inode.type)) } def inodeType: InodeType } I need to create this class dynamically. Currently, I have to define it on the fly, like this: def createUniqueDataSource(inode: Inode): UniqueDataSource = { implicit val baseClass: BaseClass = new BaseClass(inode) new UniqueDataSource(inode.inodeType, inode.name, inode.type) } I am wondering, is there a way to compile this Scala code and get the 6d1f23a050
