the second mandatory minimum sentence of twenty years imprisonment for possession of a firearm in the commission of a drug offense, would result in a guideline range sentence of 240-262 months. in the absence of this mandatory minimum, the defendant would face a guideline range sentence of 195-231 months. the defendant linda jeter entered a guilty plea before this court to conspiracy to distribute and possess with the intent to distribute more than five grams of crack cocaine within 1,000 feet of a school on march 11, 1997. the office 2007 open xml specification was released by microsoft on august 10, 2007.this specification specifies an xml-based format for docx, xlsx, pptx and some proprietary office binary formats.office 2007 xml formats support all of the office application data in richly structured and richly formatted xml markup.therefore, you can write your own document or open an existing document and change its contents directly in place without the need to recompile.this makes it possible to work with data that is stored in multiple formats.the xml-based format means that the office suite can remain open and available and can be safely updated when needed.it also means that if the format changes, you don't have to worry about converting your data to the new format.another key advantage is that the xml format allows the office suite to read and write files that are saved in multiple formats.you can open an excel document in word, for example, and edit the table on the page.as the xml-based format supports links, you can also link files to each other and share the data.saving a file with office 2007 xml formats allows you to generate office 2007 compatible files. microsoft office 2007 xml formats are binary compatible with the previous office binary formats.
