Who invented this wonderful thing? We're looking for the person, who had the idea and created this awesome thing! So if you're the one who is responsible for it, do not hesitate to contact us. We will be so glad to share our honor with you. A teenager has been arrested in Italy in connection with the murder of a teenage girl whose body was found in a shallow grave last week. The 16-year-old boy was arrested on Friday in the city of Palermo, police said. He was detained in connection with the murder of Giulia Salda. The body was found by a farmer digging in his field in the town of Montalto di Castro on 3 September. Police said she had been raped before she was killed. The investigation was "provocative", with DNA and fingerprints found on the body. A knife was also found at the scene. Detained on suspicion of murder and rape Giulia Salda. Photograph: Agnieszka Sosnowska/AP Giulia Salda's parents said they are relieved that the arrest was made, but "sad" about the circumstances surrounding the arrest. "We are sad about the detentions that have not been made in other situations, but we are delighted that the detentions have been made," the parents said in a joint statement. "We hope that justice will be done for Giulia." Investigators believe there is more than one person involved in the death, and are questioning two more young suspects. "We

What's New In Waply Free Ringtones Player?

Description: Waply Player will let you preview all the ringtones that you want, and then export them to your mobile phone. With Waply Player you can preview as many ringtones as you want, even from files located on your PC or any other drive or server, without downloading them to your phone. If you have to transfer your own or another ringtone from your PC to your mobile phone, you just need to go to Waply Player and select the file that you want. Then you select the destination directory (SDCard, USB, etc.) where you want to store the ringtone. When you are done, the ringtone will be transferred to your mobile phone. You can now go to your mobile phone to listen to your new ringtone. An excellent utility to manage and preview your mp3, wav, ogg, oga, wma, midi, mp4, wavp and wma ringtones! *View as many ringtones as you want in list view. *Click on a ringtone to preview the preview player. *Open the ringtone in media player. *Share ringtones with other Waply Player users via mail, message, etc. *Click on an individual ringtone to edit/update the information about the ringtone. *Create new ringtones by selecting a song in the player and press the "+" button. *Export selected files to SDCard. *Export to phone memory (SD card, USB, etc.) by choosing a destination directory. Notes: *Waply Player has a limit of one thousand selected ringtones. *Waply Player has a limit of ten thousand selected songs. *There is no limit to the number of songs that you can add. Alignment software is a powerful and flexible tool that will enable you to align any Word document with any number of applications using the features that Microsoft Office has to offer. Once alignment has been set up, you can use this tool to edit and change any aspect of your document including font, headers, footers, paragraph indents, text position, and other text elements that you might want to change. The preview feature is incredibly useful. Not only does it show you what your document will look like once it has been aligned, but you can also add or remove text elements to the document in real time. Alignment software is a powerful and flexible tool that will enable you to align any Word document with any number of applications using the features that Microsoft Office has to offer. Once alignment has been set up, you can use this tool to edit and change any aspect of your document including font, headers, footers, paragraph indents, text position, and other text elements that you might want to change. The preview feature is incredibly useful. Not only does
