What's New in the?

Weather Guide is a small widget that shows the current weather conditions directly on your desktop, keeping you up-to-date. It can be easily installed and configured, even by inexperienced users. The app's interface is wrapped in a small frame which can be repositioned to any spot on the screen, with the help of the mouse cursor. So, all you have to do is write your current location (city and country), in order for Weather Guide to quickly check the weather details. From the 'Settings' area, you may select the temperature measuring unit between Celsius and Fahrenheit, as well as specify the refresh interval (in minutes). The frame of the tool shows the current temperature, humidity, wind strength and bar, along with the forecast for the following two days. Weather Guide does not put a strain on the computer's resources, as it uses a very low amount of CPU and system memory.

Therefore, it shouldn't interfere with the your other currently running applications. It is very responsive to keyboard strokes and mouse commands; Weather Guide worked smoothly during our tests, without freezing, crashing or popping up error dialogs. Unfortunately, the app has not been updated for a very long time, but it should please all users who want to know the current weather conditions. FEATURES: + Show the current temperature and humidity, along with the forecast for the following two days. + Use Fahrenheit or Celsius temperature measuring unit. + Refresh interval is adjustable between 15 seconds and 6 hours. + Weather information is shown on the app's frame. + You can double-click on the frame, in order to access the 'Settings' area. + Weather Guide offers a blue-coloured background with

white stars. + Weather Guide has a small frame, which can be positioned anywhere on the desktop. + No other components are visible on the desktop. + No annoying pop-ups. + Weather Guide is very responsive and has a smooth feel. + It works quietly and efficiently, using a very low amount of resources. + Weather Guide is not designed to interrupt the user from doing other work. + The app does not need to be restarted after configuring. + Use the mouse to move the frame around. + The speed of the weather details is adjusted to the speed of the mouse pointer, so you will have no problem watching the weather while you work. CERTIFICATES This program is distributed with NO WARRANTY. Welcome to the ShareMe. Shareme is a dedicated internet portal bringing users the latest shareware & freeware from the world's best Software Authors.
