The Boss of Production There's a new element in the HVAC industry these days, and it's getting called the "Big HVAC Guy". Even though he's small compared to the rest of the industry, the Big HVAC Guy holds the answers to many production problems. There are many reasons why the Big HVAC Guy is growing in popularity: He's available. He's a good communicator. He's less prone to errors. He has good tools. He has a good sense of people. The Big HVAC Guy is currently making up about half of my business, and I'm pretty pleased about that. If you have a good Big HVAC Guy in your area, I suggest you make the effort to get to know him. They're usually very friendly, and he or she will provide a huge service to your facility. Of course, not every facility can get a Big HVAC Guy, so I decided to create a 2-hour video training course that provides the same training as a master HVAC technician. It will teach you everything you need to know to perform a good inspection. You'll be able to see how to find trouble, where to look, and how to use the correct tools. This is the beginning of a new video course that I'll be releasing in the next couple of months. It will take you on a tour of my facility and show you how I do it. This is the first of many courses I'll be producing, and I'm excited about the new ideas I can bring to the industry.
